

## Apple Recalls Laptop Batteries

Contributed by Administrator  
Friday, 25 August 2006

Last week it was Dell and this week it's Apple's turn to issue a recall on laptop batteries

This recall is directed at users of Mac iBook G4 and Powerbook G4 laptops sold between October 2003 and August 2006. An estimated 1.8 million batteries are involved.

This recall is related to Dell's and affects laptops that were sold with a Sony battery.

You can read the full story [here](#)

And full details of the recall can be found on the Apple site [here](#)
